To Whom It May Concern

CHARISSA SNIJDERS

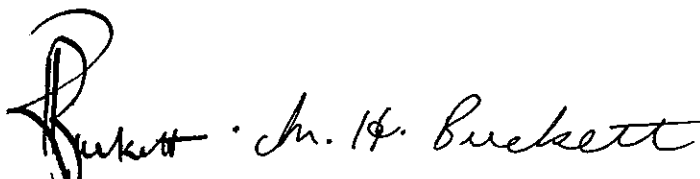

Charissa Snijders has been known to us for almost five years and has been engaged on several projects as an architect and as a consultant to advise in other architectural matters, particularly colours. She has been involved in the total project from analysing the client needs through the design development process, working and tender documentation, building consent and construction. Her drawings are clear, precise and practical.

We feel she has shown an excellent understanding of the 'human' needs, together with the functional requirements of design. We are particularly pleased with the result at our holiday home and it receives regular favourable comments from visitors. The result came through close cooperation between Margaret and Charissa in decisions on function. The bold, innovative internal colour scheme reflects the Omaha environment to the best effect. The exterior is deliberately understated to suit our needs for a holiday retreat.

Charissa is very professional and personable in her dealings. The builder of our holiday home commented on Charissa's practical and helpful approach to problem solving and the Code Compliance Certificate on completion was obtained without difficulty.

We have no hesitation in recommending Charissa and we wish her well in her future as an architect.

Yours faithfully

Rob and Margaret Buckett
